Software developer with more than a year of experience in the Backend area with Laravel (PHP) and Spring Boot (Java) in a self-taught way, eager to work! I have remote teamwork experience. Predisposition for continuous learning.

PHP, Laravel, JavaScript, [Java](#), Spring Boot, Bootstrap, HTML, CSS/SASS, Docker, PostgreSQL, MySQL/MariaBD, Introductory MongoDB, Git, Linux/Unix, Scrum basic, Excel, [Flutter](#), [AWS](#).

ONtechnology Inc. / Full Stack

June 2022 - June 2023, Remote

- Modules, such as reports and invoices, have been developed and improved for the existing [RoibGas](#) (ERP) client. Javascript has been used to add dynamism by manipulating the DOM. In addition, the transfer of information has been optimized and the query response time reduced using Laravel (PHP) and Eloquent (MySQL).
- Troubleshooting balances through software testing based on [agile testing](#), Xdebug, unit testing, and Quality Assurance environment.
- Adjusting modules for Syon (ERP) project in Java using Data Transfer Object for billing, XML (Learning Spring Boot helped me).
- Documentation of error resolution, code refactoring, modular design in RoibGas for billing, reports, automated tasks (cron job).

Freelance / Software Web Developer

February 2022 - June 2022

- Implementing projects for the client, Laravel with PostgreSQL

University Center for Linkage and Transfer of Technology / Professional Practice for the initial design of an online store

January 2021 - January 2022, Puebla, Mexico

- Applying RestFul API with Angular and [asynchronism](#).
-

Meritorious Autonomous University of Puebla, B.S. in Engineering in Computer Science

January 2017 - December 2021, Puebla, Mexico

- Graduated with a GPA: 3.37. Initiative in programming teams.

Platzi, JavaScript School

April 2023

- [Node.js](#) and practices in ECMAScript versions.

Udemy / Platzi, [Laravel](#), Laravel livewire and Spring Boot Courses

June 2022 - Now

- [Accounting](#) management system focuses on warehouse management (for products and reports), sales (to sell and close sales box in it), as well as managing users, verifying sales reports.
- Single Page Applications en Laravel con Inertia y Vue.js
